**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 and 17-27, drawn to a method for analyzing nucleic acids using nucleic acid microarrays methods for processing a plurality of microarrays and methods for , classified in class 435, subclass 6.
  - II. Claims 2-16 and 28-33, drawn to an apparatus and system for processing microarrays, classified in class 422, subclass 68.1.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as apparatus and methods for using the apparatus. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product i.e. the methods of Invention I can be practiced manually. The methods can be practiced by dipping microarrays in to solutions, transferring solutions using micropipettes and/or capillaries thereby fluidically coupling and/or separating the microarrays relative to the method step.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
